Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukumoto et al (5069960) FU. FU discloses a foam glass tile with a closed outer pore skin and having a density in the range of 14.16 lb/cu ft- 92.6 lb/cu ft (.2-1.3 gm/cc) and having a weight in the range of 12.5 lb-187 lb (3-75mg). The latter values include the recited density between 30-100 lb/cu ft and the weight greater than 100 lbs. The tile further comprises an interior portion 10 and the tile outer skin comprises an additive 12 or a pigment to make its surface appear a different color than the interior portion of the tile. The tile may be used in a building or lightweight building façade (column 6, lines 1-12 and having the same recited values as the prior art the same is capable of withstanding earthquake damage.

Glass is known to be made with a textured or glazed surface for aesthetic appeal. One of ordinary skill in the art would have added these decorative effects for

aesthetic appeal. The same has no bearing on the overall structure and function of the glass.

The tile's surface area and thickness has been considered a matter of choice and routine procedural design; one of ordinary skill in the art would have appreciated the use and purpose of the tile and would have selected the above values to be commensurate with the intended use of the tile.
